In preparation for our June 2, 2015 meeting with the Oregon Department of Agriculture, the CZARA Ag Technical Team developed a list of questions we thought, if answered, would help us better understand how ODA's programs work to achieve the CZARA management measures in protection of water quality and beneficial uses. These questions will not be shared with ODA, rather they are intended to help us think about the State's programs and prepare us for having a fruitful dialogue with ODA both during the June 2 meeting and future meetings.

Feel free to contact any of the CZARA Ag Tech Team Members if you have thoughts about the questions.

Alan
